EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joe McKinney Muncy on April 29, 2005.

The application has been amended as follows:

Specification Amendments:

On page 2, line 25, amend "analog filter/amplifier" with the following:

-- analog filter/amplifier 13 --.

On page 6, line 15, amend "To make it easier for our examiner to" with the following:

-- To --.

Claim Amendments:

In claim 1, lines 12-20, amend "a bio-signal measurement, for receiving a signal transmitted from said bio-potential sensor and coupling to a negative feedback difference common mode signal and a buffer/balanced circuit, thereby said buffer/balanced circuit being fed back to said negative feedback difference common mode signal, and said both negative feedback difference common mode signal and

buffer/balanced circuit providing a circuit with a self common point electrode potential;”
with the following:

- -

a bio-signal measurement unit for receiving a signal transmitted from said bio-potential sensor and coupling to a negative feedback difference common mode signal unit and a buffer/balanced circuit, wherein said buffer/balance circuit feeds back a signal from said negative feedback difference common mode signal unit to said bio-signal measurement unit, and wherein said both negative feedback difference common mode signal unit and buffer/balanced circuit providing a circuit with a self common point electrode potential;

- -.

In claim 1, line 21, amend “analog filter/amplifier,” with the following:

- - analog filter/amplifier - -.

In claim 1, line 23, amend “processing unit” with the following:

- - processing unit - -.

In claim 1, line 24, amend “for” with the following:

- - to - -.

In claim 1, line 25, amend “processing and comparing” with the following:

- - process and compare - -.

In claim 1, line 26, amend “signal processing unit,” with the following:

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Both, Lekhtman (US 5,337,753 A) and Leon et al (US 5,365,934 A) teach using active and common mode electrodes as described in the Applicant's admitted prior art in the "Background of the Invention" section of the Specification.

Bates (US 6,165,129 A) teaches removable "display device" 49 from a "pulse measurement device" 10.

Richter (US 6,115,629 A) teaches a "ESD protection circuit" 105 (see fig. 1A).

In regards to independent claim 1, the prior art of record does not teach a bio-signal measurement coupled to a negative feedback difference common mode signal and a buffer/balanced circuit, wherein the buffer/balanced circuit is fed back to the negative feedback difference common mode signal, and wherein both negative feedback difference common mode signal and buffer/balanced circuit providing a circuit with a self common point electrode potential.

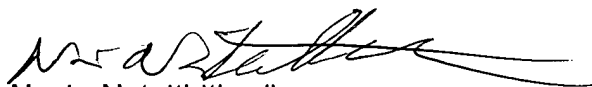

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
